- Certification course in **Data Science from UpGrad (2021)**
- Completed 6 hours of **JavaScript course from Udemy (2021)**
- Completed **Face Recognition Project in python from Udemy (2020)**

Projects

Covid Tracker Website
Created a covid tracker that provides real-time covid data of the entire country. HTML, CSS, JS, and Bootstrap are used in this project. The website uses API calls to get data and then presents it. The site is responsive for all kind of devices.

Face Recognition Model
Using Python, OpenCV, Library, Haarcascade, and the LBPH Face Recognizer method, Created a Face Detection and Recognition Model. It detects faces and recognize them and can be used to create a face recognition-based attendance system.

Weather App
Using HTML, CSS, JavaScript, and the OpenWeather API, I created a weather app that displays real-time weather data. You may look up the weather in your city and get information on temperature, humidity, wind speed, and UV index.
